Asad Ikram

MSc Data Analytics (Distinction), University of Portsmouth · Chevening Scholar 2024/25
Lahore, Pakistan · +44 7482 376417 · asad.ikram53@gmail.com · LinkedIn: linkedin.com/in/asad-ikram98 · Portfolio: asad-ikram-mc.github.io/portfolio · web-scraping-guide.com

PROFILE

Computational social scientist in training and data engineer working on online opinion: how people express views on platforms, and when machine-labelled text can be compared across media. I build LLM agents and labelling pipelines in Python and run them in production, and I have eight years of collecting and analysing large multilingual text (from 300+ freelance clients to companies in nine countries). I want to help map democratic belief systems from AI-led interviews in a way that holds across modes, languages and countries.

WHAT THE POSITION ASKS FOR

Python and LLMs	Self-healing and builder LLM agents at M+C Saatchi Fluency (Claude with tools on a server I built, ground rules, approval gates); LLM labelling cascade at Artemis AI (own models, then DeepSeek, then Claude).
Text as data, NLP	Fine-tuned BERT on 250,000+ policy posts (MSc); BERTopic codebook with versioned, human-checked LLM tagging on 270,000+ mentions (Fluency); XLM-R, DistilBERT and DeBERTa classifiers (Artemis AI).
Belief systems, democratic attitudes	Dissertation on public reaction to UK economic policy; methods paper treating platforms as survey modes (measurement invariance, DIF, linking); Chevening proposal on evidence of public opinion for government.
Organisation, deadlines	CTO leading a team of five to a fixed beta date; client delivery across 300+ projects; led three engineers at Dubizzle Labs.

RESEARCH

Ikram, A. and Haig, E. "Is the Platform Part of the Measurement? A Protocol and Simulation Study for Cross-Platform Equivalence of Machine-Labelled Policy Sentiment." Preprint, arXiv:2610.16757 (2026), arxiv.org/abs/2610.16757. Treats each platform as a survey mode and applies generalizability theory, measurement invariance and differential item functioning, and score linking to machine-labelled text. I built the simulation: with known ground truth, pooling platform scores at face value gives the wrong sign of daily aggregate sentiment on roughly a quarter of days, from measurement differences alone. *No peer-reviewed publications to date.*

EDUCATION

Sep 2024 - Sep 2025
awarded 8 Dec 2025

MSc Data Analytics, Distinction. University of Portsmouth, United Kingdom. Chevening Scholar. Credit-weighted average 70.5/100; master's project 78/100. Supervisor: Dr Ella Haig. Modules included Big Data and Machine Learning, Intelligent Data and Text Analytics, Explainable AI and Data Management.

Dissertation: *Cross-Platform Sentiment Analysis of Public Reaction to UK Economic Policies.* About 279,000 public posts from X/Twitter, Reddit, YouTube and Quora, under university ethics approval (TETHIC-2025-111094). Fine-tuned BERT against BiLSTM and lexicon baselines; 200 posts hand-labelled; McNemar and bootstrap tests, chi-square tests across topics, Prophet forecasting.

Aug 2017 - Jan 2022

BS Computer Science. National University of Computer and Emerging Sciences (FAST-NUCES), Pakistan.
Courses included Probability and Statistics, Linear Algebra, Calculus I and II, Numerical Methods, Design and Analysis of Algorithms, Database Systems and Applied Machine Learning.

EXPERIENCE

Dec 2024 - present
part-time, remote

Data Engineer, M+C Saatchi Fluency, London. Social media analysis for global brands including Amazon, Ford, Nike and Reckitt, and for UK government.

- Analyst on a twelve-month discourse study (100,845 Brandwatch and 170,542 Reddit mentions): BERTopic codebook, versioned LLM tagging.
- Social data collection, labelling and tagging, text and sentiment analysis with AI/ML, forum sourcing and pipeline architecture; a weekly pipeline of 2.2 million rows.
- Built a self-healing agent that diagnoses a broken forum crawler, regenerates it and tests it on live pages, and a builder agent that creates new crawlers, across a fleet of 64; secured with prompt fencing and approval gates, and I approve each merge.

2025 - present
part-time

Co-Founder and Chief Technology Officer, Artemis AI, United Kingdom. Social-media intelligence for creators and businesses.

- Processed 3 million+ Facebook and Instagram comments (111,000+ posts) on AWS: Meta Graph API collectors, an Apache Iceberg warehouse, and an LLM labelling cascade designed to escalate from our own NLP models to DeepSeek and then Claude.

- Building a 48-model system for the 15 December 2026 beta: comment toxicity, intent and topic classifiers tested on blind human-labelled sets; a storm detector for bursts of hostile comments; spam, bot, language and banter filters so dialect is not read as toxicity; community detection and match scoring on the network of pages; best-time, engagement-outlook and post-health models; image and video understanding (OCR, CLIP, Whisper); and Art-E, a retrieval-based advisor on Amazon Bedrock.
- Lead a team of five across models, AI/ML, deployment, app development and design; take part in pitching.

Feb 2022 - Aug 2024
full-time

Associate Software Engineer, then Data Engineer, then Senior Data Engineer, Dubizzle Labs (Dubizzle, Bayut, Zameen, OLX), Lahore. Promoted twice in about two and a half years.

- Data modelling and machine learning for competitor-intelligence dashboards: what people discussed, how much volume each site carried, and what worked on each platform and in which region.
- Designed the company's first web-scraping architecture on AWS: 15 markets, English, Arabic, Urdu and Hindi; led a team of three engineers in scraping and data warehousing. Owned a data-warehousing product end to end.

May 2023 - present
contract, remote

Data Engineer (contract), Fix.com, Canada. OCR-based machine learning to parse parts catalogues from PDFs; models to backfill missing parts data; since June 2026, sole designer and operator of the crawler platform (about 10 million rows across 82 datasets).

2018 - 2026
remote

Other data engineering work. Lead Data Engineer, VendueTech, Ireland (2025: Azure-to-AWS migration, team of three); Data Engineer, Prefe, Milan (2024); CXG, Dubai (production crawlers, pytest QA); Metoda, Germany; web-scraping architecture for a US start-up and businesses in the Netherlands and Lithuania; earlier work for companies in India and Japan; freelance on Fiverr from 2018, starting during my BS: 300+ clients.

SKILLS

Coding	Python (pandas, Scrapy, PyTorch, FastAPI, pytest), SQL, PySpark; Git, GitHub and CI.
Data and databases	Collection from APIs and the open web at scale; cleaning, deduplication, joins and validation; PostgreSQL, Redshift, Athena, DynamoDB, Apache Iceberg; AWS, Docker, Kubernetes.
Modelling and statistics	Hypothesis tests (McNemar, chi-square), bootstrap, Prophet forecasting; simulation with known ground truth; generalizability theory, measurement invariance and DIF, score linking; validating machine and LLM labels against human-labelled sets.
NLP and AI	Fine-tuning encoder classifiers (BERT, XLM-R, DistilBERT, DeBERTa-v3); LLM-assisted labelling (Claude, DeepSeek); OCR, CLIP and Whisper; BERTopic; LIME and integrated gradients; building AI agents; AI coding assistants (Claude Code, OpenAI Codex), where I write the specification and tests and decide what merges.

AWARDS, COMMUNITY AND LANGUAGES

Chevening	Chevening Scholar 2024/25 (UK Government's global scholarship, which funded the MSc), awarded for helping students and junior colleagues into freelance and remote careers and for a proposed cross-platform social media analytics system to give government evidence of public opinion.
Community	Author and maintainer of web-scraping-guide.com (since May 2026), a free public guide to web data collection. Helped university students start freelance careers and junior colleagues at Dubizzle into remote work; two of them got remote jobs.
Languages	Urdu (native); English (working language; MSc taught and assessed in English, IELTS 6.5).

REFEREES

Dr Ella Haig, Associate Professor in AI, School of Computing, University of Portsmouth. Ella.Haig@port.ac.uk. MSc dissertation supervisor and co-author.

Dr Fahad Ahmad, Senior Lecturer, Centre for Cybercrime and Economic Crime, University of Portsmouth. Fahad.Ahmad@port.ac.uk. Taught and assessed me on the MSc.
