

Curriculum Vitae

Politecnico di Milano · PhD in Information Technology, 42nd cycle · call 5722-5460
Auditing and Mitigating Epistemic Failures in Web-Connected AI Agents

PERSONAL INFORMATION

Surname	Ikram
Name	Asad
Address	Lahore, Punjab, Pakistan
Telephone	+44 7482 376417
E-mail	asad.ikram53@gmail.com
Skype	—
Nationality	Pakistani
Date of birth	20 January 1998

EDUCATION AND TRAINING

Date (from – to)	September 2024 – December 2025
Organisation	University of Portsmouth, United Kingdom (public university)
Duration of the programme	1 year full time (180 UK credits; transcript states 90 ECTS)
Principal subjects	Data Analytics. Intelligent Data and Text Analytics; Big Data and Machine Learning; Explainable AI; Data Management (80/100)
Title of qualification	MSc Data Analytics
Final mark obtained	Distinction. UK scale 0–100, where Distinction is the highest classification and requires 70 or above. Masters project mark 78/100.

Date (from – to)	August 2017 – December 2021 (degree awarded April 2022)
Organisation	National University of Computer and Emerging Sciences (FAST-NUCES), Islamabad, Pakistan
Duration of the programme	4 years full time (130 credit hours)
Principal subjects	Computer Science. Data Structures; Database Systems; Operating Systems; Computer Networks; Artificial Intelligence; Applied Machine Learning; Data Mining; Design and Analysis of Algorithms; Probability and Statistics
Title of qualification	BS (Computer Science)
Final mark obtained	CGPA 2.75 on a 0.00–4.00 scale (minimum required for the degree: 2.00). 130 of 130 credits earned; degree status Completed.

GRADUATION THESIS

Title	Cross-Platform Sentiment Analysis of Public Reaction to UK Economic Policies
Language	English
Supervisor	Dr Ella Haig, Associate Professor in Artificial Intelligence, University of Portsmouth

ASAD WRITES THIS – Thesis Summary, maximum 1000 characters. Yours to write, not mine. Facts you can draw on, all verified: ~279,000 public posts collected across four platforms (X/Twitter, Reddit, YouTube, Quora) on UK economic policy via official APIs and licensed feeds, under ethics approval and GDPR-compliant procedures; fine-tuned BERT classifier reaching macro-F1 0.878 against BiLSTM and lexicon baselines; human validation at Cohen's kappa ~0.78; temperature-scaling calibration; McNemar and bootstrap significance testing; NRC emotion analysis; LIME interpretability; Prophet forecasting of the daily sentiment index at MAE ~0.02. The central finding was that the same policy event produced structurally different sentiment and emotion profiles on different platforms. Write it in your own words.

PUBLICATIONS AND ARTICLES SUBMITTED

Author(s) and title	Ikram, A. and Haig, E. — “Is the Platform Part of the Measurement? A Protocol and Simulation Study for Cross-Platform Equivalence of Machine-Labelled Policy Sentiment”
Language	English
Publication place	Manuscript, complete. To be posted to arXiv (cs.SI).
Date of publication	Not yet published — submitted to arXiv, 2026

No peer-reviewed publications to date. This is stated plainly rather than dressed up; the call's scoring rewards the research proposal far more heavily than publication count.

CERTIFICATIONS

GRE	Not taken
GMAT	Not taken
Language certification	IELTS Academic , test date 28 March 2024, Test Report Form 23PK507881IKRA011A. Overall Band Score 6.5 (Listening 7.0, Reading 6.5, Writing 6.0, Speaking 7.0). CEFR level B2. This exceeds the minimum of 6.0 required by Article 2 of the call.

WORK EXPERIENCE

Date (from – to)	February 2025 – present
Firm	ArtemisAI Ltd (trading as ViralData), United Kingdom — remote
Sector	Social media intelligence software
Type of employment	Founder and Chief Technology Officer
Main activities	• Founded and lead the company; built the platform end to end, from Meta Graph API ingestion of 30+ pages daily into a layered lakehouse and Redshift warehouse. • Designed and deployed six production NLP model endpoints on AWS SageMaker (sentiment, emotion, toxicity, topic, language, intent), fine-tuned from XLM-R, DistilBERT, DeBERTa-v3 and Detoxify bases on a ~20,000-item weighted dataset, with a per-sample loss weighted by label confidence, class balance and label source. • Built the labelling pipeline these models learn from: an LLM labels a stratified seed set with its reasoning, decision rules are mined from that reasoning into a prompt for a second model, and low-confidence cases route back for review. • Built multimodal analysis into production: CLIP image-text embeddings feeding a trained fusion classifier (macro-F1 0.93 on a gold set), a hybrid OCR pipeline (token-F1 0.928), and video intelligence with speech transcription. • Instrumented the measurement layer itself: a three-tier fallback cascade with logged confidence routing and weekly divergence monitoring. Its measured inter-model agreement (82.9% on sentiment, 0.0% on toxicity) is what motivates my research interest in annotation reliability.

Date (from – to)	December 2024 – present
Firm	M+C Saatchi Fluency, United Kingdom — remote
Sector	Data consultancy, government and commercial communications
Type of employment	Data Engineer, consultant
Main activities	• Designed and operate the multi-platform social listening pipeline behind campaign intelligence for UK Government departments and for Amazon, Ford, Nike and Reckitt: Sprinklr and Brandwatch feeds plus custom crawlers into AWS (ECS Fargate, Step Functions, Glue, Athena), with SageMaker NLP sentiment models. • Run a fleet of 68 collectors (62 active) with an automated repair agent operating as a named CI workflow, including anti-bot handling, proxy rotation and TLS

fingerprint management, at 99%+ pipeline uptime.

- Maintain data governance on government-facing datasets: documented filter rules, permanent removal lists, pre-delete backups and weekly refresh cycles.

Date (from – to)	February 2022 – August 2024
Firm	Dubizzle Labs (Dubizzle, Bayut, Zameen, OLX), Pakistan — on site
Sector	Online classifieds and marketplaces
Type of employment	Senior Data Engineer
Main activities	• Led a three-engineer team owning 500+ regional web collectors across 15 MENA countries on Kubernetes/EKS, gathering multilingual platform data in English, Arabic, Urdu and Hindi. • Redesigned the layered data warehouse (RDL, ODL, ADL), improving ETL/ELT throughput by 60%. • Promoted twice in two years: Associate Software Engineer to Data Engineer to Senior Data Engineer.

Date (from – to)	May 2023 – present (part time)
Firm	Fix.com, Canada — remote
Type of employment	Data Engineer, consultant
Main activities	Designed Scrapy/Scrapyd pipelines processing 50M+ data points from 200+ sources; cut crawl time 40% through distributed cluster tuning; introduced Great Expectations validation with automated schema-drift detection, reducing bad production data by 70%.

Other positions	• Lead Data Engineer, VendueTech, Ireland, remote contract, June – July 2025. Led three engineers building real-time auction data ingestion; migrated Azure to AWS. • Data Engineer, consultant, Prefe, Italy, remote, September – December 2024. Rebuilt legacy Scrapy architecture, reducing failure rate 60%; mentored two junior engineers. • Freelance Data Engineer, CXG, Dubai, remote, December 2025 – January 2026. Production crawlers for global luxury fashion brands at 99%+ completeness against advanced anti-bot protections. • Senior Freelance Data Engineer (Level 2 seller, 300+ projects), worldwide, December 2018 – February 2026. 300+ five-star data engineering projects across 400+ websites for 50+ international clients.
-----------------	--

PERSONAL SKILLS AND COMPETENCES

Mother tongue	Urdu
Other language — English	Reading: excellent · Writing: good · Speaking: excellent <i>Stated to match the IELTS profile above rather than above it (Writing 6.0).</i>

ASAD WRITES THESE THREE — social, organisational and other skills. These are personal-voice sections and they are yours. Prompts only, not text to copy: **Social** — you have worked across Pakistan, the UK, Ireland, Italy, Canada and the UAE, in Urdu, English and alongside Arabic and Hindi data; Chevening selected you from 70,000+ applicants across 160 countries. **Organisational** — you have led three-engineer teams twice, you run a company with a named delivery team and a launch date, and you were promoted twice in two years. **Other** — you wrote and maintain web-scraping-guide.com, a free 24-section public engineering reference.

TECHNICAL SKILLS AND COMPETENCES

Machine learning and NLP	Transformer fine-tuning (BERT, XLM-R, DistilBERT, DeBERTa-v3); CLIP multimodal embeddings; Whisper speech transcription; OCR pipelines; BiLSTM; measurement
--------------------------	---

and psychometric methods (generalizability theory, measurement invariance, differential item functioning, score linking); calibration; statistical testing (chi-square, McNemar, bootstrap intervals); LIME and attribution; NRC and VADER lexicons; Prophet time-series forecasting.

Data collection

Scrapy, Playwright, Selenium; official platform APIs (Meta Graph, Reddit, YouTube); licensed feeds; proxy and anti-blocking management; TLS fingerprinting; detection anatomy; agentic browsers.

Engineering

Python, PySpark, SQL; AWS (Fargate, Glue, Athena, Redshift, SageMaker, Step Functions, Lambda, DynamoDB); Airflow; Docker and Kubernetes; PostgreSQL; CI/CD with automated quality gates.

ADDITIONAL INFORMATION

Awards

Chevening Scholar 2024/25 — the UK Foreign, Commonwealth and Development Office's flagship global scholarship, awarded to fund the MSc at Portsmouth.

Public work

Author, web-scraping-guide.com — a free public engineering reference on web data collection: 24 sections covering 60+ libraries and tools, six anti-bot systems, legal and ethical constraints, production architectures and data quality.

Referees

Dr Ella Haig, Associate Professor in Artificial Intelligence, University of Portsmouth, Ella.Haig@port.ac.uk, telephone [\[ask Ella\]](#); and **Dr Fahad Ahmad**, Senior Lecturer, University of Portsmouth, Fahad.Ahmad@port.ac.uk, telephone [\[ask Fahad\]](#) — entered in the online form.

BEFORE EXPORTING. Choose at most two attachments to append into the same PDF (the Haig manuscript, and either the dissertation or the web-scraping guide). The whole file must stay under 10 MB. Delete every yellow box, including this one.
